

**Abingdon Peace Group Online Meeting
TUESDAY 16th March 2021 at 8.00 pm**

Zero Carbon – why NOT nuclear?

**Speakers: Dr Andy Stirling, Dr Phil Johnstone,
and Dr Rowland Dye**

Dr Andy Stirling and Dr Phil Johnstone are Sussex University researchers, who present compelling evidence that nuclear power is obsolete in achieving zero-carbon, but exists now purely to underpin military use.

This talk was given at a recent meeting of CND Salisbury and we will be playing a recording then discussing the implications.

Other speakers are Dr Rowland Dye, activist and nuclear physicist; and Nikki Clark, who founded the campaign against Hinkley Point C.
