'Countdown to Zero' reveals the truth behind an issue on which human survival itself hangs- the very real possibility of nuclear disaster. It is a documentary film that traces the history of the atomic bomb, focussing on accidents and false alerts.

A chilling wake-up call, it shows in detail the threat posed by the smuggling of nuclear materials which are available for sale to terrorists, and how they can evade detection by port security systems.

Made by the producers of '**An Inconvenient Truth**', it features insights from a host of international experts and world leaders.

Whatever your stance on nuclear weapons, come to see this film which is bound to inform you on one of the dominant global threats of our time.
